Supply Chain & Operations Manager with 10+ years optimizing manufacturing, logistics, and vendor networks across APAC

EDUCATION

2014	M.Sc. Industrial & Systems Engineering - NATIONAL UNIVERSITY OF SINGAPORE (NUS), Singapore Focus: Supply Chain Optimization GPA: 4.6/5.0
2011	B.Eng. Mechanical Engineering - NANYANG TECHNOLOGICAL UNIVERSITY (NTU), Singapore Second Upper Class Honours

WORK EXPERIENCE

Jan 2020–Present	Regional Supply Chain Manager, APAC - FLEX LTD., Singapore Network optimization: Own end-to-end supply chain planning for 6 manufacturing sites across APAC with combined annual throughput of \$780M, reducing total logistics cost by 12%. Supplier management: Renegotiated contracts with 40+ tier-1 suppliers during the 2021–22 chip shortage, securing priority allocation and avoiding an estimated \$25M in production downtime. S&OP transformation: Implemented a monthly Sales & Operations Planning process integrating demand, supply, and finance, improving forecast accuracy by 18 percentage points. Sustainability: Led a freight-consolidation and modal-shift initiative that cut regional logistics carbon emissions by 9% year-on-year.
Apr 2016–Dec 2019	Operations Manager - FLEXTRONICS (NOW FLEX), PENANG SITE, Penang, Malaysia - Managed daily production operations for a 900-employee electronics manufacturing site, consistently hitting 98%+ on-time delivery. - Led a Lean Six Sigma initiative that reduced line changeover time by 35%, freeing up 1,200 hours of annual production capacity. - Introduced a vendor-managed inventory program with key component suppliers, reducing raw material inventory by 20% without impacting service levels.
Jul 2014–Mar 2016	Supply Chain Analyst - SEAGATE TECHNOLOGY, Singapore - Built demand forecasting models for hard disk drive components, reducing forecast error by 10% across 3 product lines. - Supported new supplier qualification for a critical component category, shortlisting and onboarding 2 alternate sources.

KEY PROJECTS

2022	Multi-Site Digital Twin Rollout Sponsored the deployment of digital-twin simulation across 3 plants to stress-test capacity plans before physical changeovers.
